Experienced Mobile Engineer specializing in Flutter and Android Native (Kotlin). Proven track record in building scalable apps using Clean/Feature-Based Architecture and BLoC. Experienced in full app lifecycles, cross-platform optimization (Mobile & TV), and delivering high-performance solutions for international and local industries.

Work Experiences

Altara Inovation Group - Malang, Indonesia Oct 2025 - Present

Mobile Engineer

- Architected and developed three Islamic mobile applications (Al-Qur'an, Quran TV, and Juz Amma for Kids) using Flutter and Clean Architecture, ensuring a highly maintainable, testable, and scalable codebase.
- Implemented BLoC state management to handle complex user interactions, audio streaming, and asynchronous data flows efficiently, delivering a seamless and responsive user experience.
- Optimized SVG asset rendering and media playback performance across diverse screen sizes (mobile and TV), eliminating UI jank and ensuring fluid, high-performance animations.
- Spearheaded bug fixing, performance tuning, and continuous maintenance based on user feedback, drastically improving app stability and long-term reliability.

ميم لام ألف - Remote, Kuwait Feb 2025 - Feb 2026

Mobile Engineer

- Developed a Qur'an mobile application using the Flutter framework, ensuring cross-platform compatibility and performance.
- Integrated Play Asset Delivery to efficiently manage and streamline large asset packs, improving app load times and scalability.
- Optimized SVG asset rendering for enhanced performance and smoother user experience.
- Performed bug fixing to resolve functional and UI/UX issues, ensuring a stable and responsive application.
- Conducted ongoing app maintenance and updates, addressing user feedback and ensuring long-term reliability.

Galaxy Property - Surabaya, Indonesia Oct 2024 - Present

Mobile Developer

- Designed and implemented features to support real estate business needs, such as property search, detailed property views, map features, mortgage calculators, and more.
- Optimized app performance for a smooth and responsive user experience.
- Created user-friendly and accessible UI designs for a wide range of users.
- Responded to user bug reports and resolved them quickly.
- Using state management BLoC and Featured Base architecture

Pandawa Agri Indonesia - Banyuwangi, Indonesia Oct 2023 - Oct 2024

Mobile Developer Flutter

- Developed mobile applications for Android and iOS platforms using Flutter.
- Integrated apps with various third-party APIs securely.
- Conducted training sessions and app demonstrations for internal teams and clients.
- Managed app launch processes on Google Play Store and App Store, ensuring platform policy compliance.
- Responsible for ongoing app maintenance, bug fixing, and feature enhancements post-launch.

Education Level

State Polytechnic of Jember - Jember, Indonesia Sep 2019 - Oct 2023

Bachelor Information Technology, 3.84/4.00

- Developed a mobile app and website for the Innovation Garden e-commerce platform.
- Designed and developed an Augmented Reality exhibition booth mobile app

Experience

Synergy Academy - Remote Aug 2023 - Mar 2024

Android Engineering

- Proficient in Kotlin for Android app development.
- Extensive experience in building Android apps.
- Expertise in utilizing Android SDK.

Skills

- **Skills:** Flutter Development, Android Native Development, UI/UX Design
- **Programming:** Dart, Kotlin, Java, C#, XML, JSON
